Client Industries

Scenario Advantage clients include:

- Civil engineering contractors
- Commercial & industrial building contractors
- Engineering & engineering services
- Heavy engineering contractors
- Infrastructure projects
- Mining
- Asset management

Technology

Scenario Advantage is available as either client / server or web enabled application package, providing a scalable solution from a single PC on site to a network of PCs through to an enterprise Wide Area Network.

It is a comprehensive solution designed to run under Microsoft Windows XP, Windows 2000, 95 / 98, and NT, and stores its data in industry recognised Relational Database Management Systems such as Oracle.

Projection

Projection was formed to bring together the skills and experience gained over the past 20 years in developing, implementing and supporting clients in the construction and engineering industries with software and professional services.

Business Streams

There are two main streams to our business

- Development of the Scenario Advantage suite of application software
- Professional services to our clients in improving their businesses through refined business processes

Our Staff

Projection staff includes project managers, engineers, accountants, software designers and programmers.

All staff are well qualified, skilled and experienced in their roles. Our consultants and project managers have commercial experience from the construction and engineering industry, a factor which we believe significantly improves our capacity to provide value added services to our clients - we bring more than simply being able to talk about issues, we have worked in roles where we have first hand experience of the issues faced each day by project managers, commercial managers, contract administrators and accountants in construction and engineering groups.

Client Industries

We are fortunate to work with a variety of construction and engineering clients ranging from major public international groups to medium sized privately owned groups.

Our focus is on improving our client's competitive advantage by providing the best systems and business processes available.

Key Industries

- Construction
- Engineering
- Power
- Utilities
- Rail
- Oil & Gas
- Mining

Development Activities

Projection's software development team undertakes a range of development activities including

- Enterprise quality Microsoft Windows Applications
- Web Based Applications
- SQL databases – Oracle & Microsoft SQL Server
- PDA – Pocket PC & Palm OS

Our Experience

Projection implements solutions aimed at organisations where managing one or more projects is the key business requirement. Projects can range in size from the smallest maintenance work order through to the largest infrastructure projects.

We have field experience on some of the mega infrastructure projects in Asia. We also have clients engaged in subcontract works involving small to medium contract values.

Projection and Business Partner regional offices provide clients with experienced software implementation, training and support services, backed up by our team of developers and support staff.
